International Workshop organised by the

Introduction

○ What is Koha?

Koha is an Integrated Library Management Software (ILMS).

ILMS, LMS or ILS are abbreviations used interchangeably to mean a system in which "all library operations such as acquisitions, circulation, cataloguing, serial control, budgeting and OPAC are processed against a single master bibliographic database."

Koha is the first open source (free) Integrated Library System (ILS), and it is used all over the world by different libraries

Koha ILS was created by Katipo Communications for the Horowhenua Library Trust in New Zealand in 1999

Koha facilitates easy, quick and convenient access to library information resources.
