Msunduzi Municipality Library Services (South-Africa)

# INTRODUCTION

- Library Management System is most essential in library institution, and it helps in library management, Circulation of library documents, maintenance of serials control, stock verification, report generation and other facilities for libraries. The user community to get the status of books, bibliographical details, new arrivals, book reservation, catalogue search and other facilities in single place.

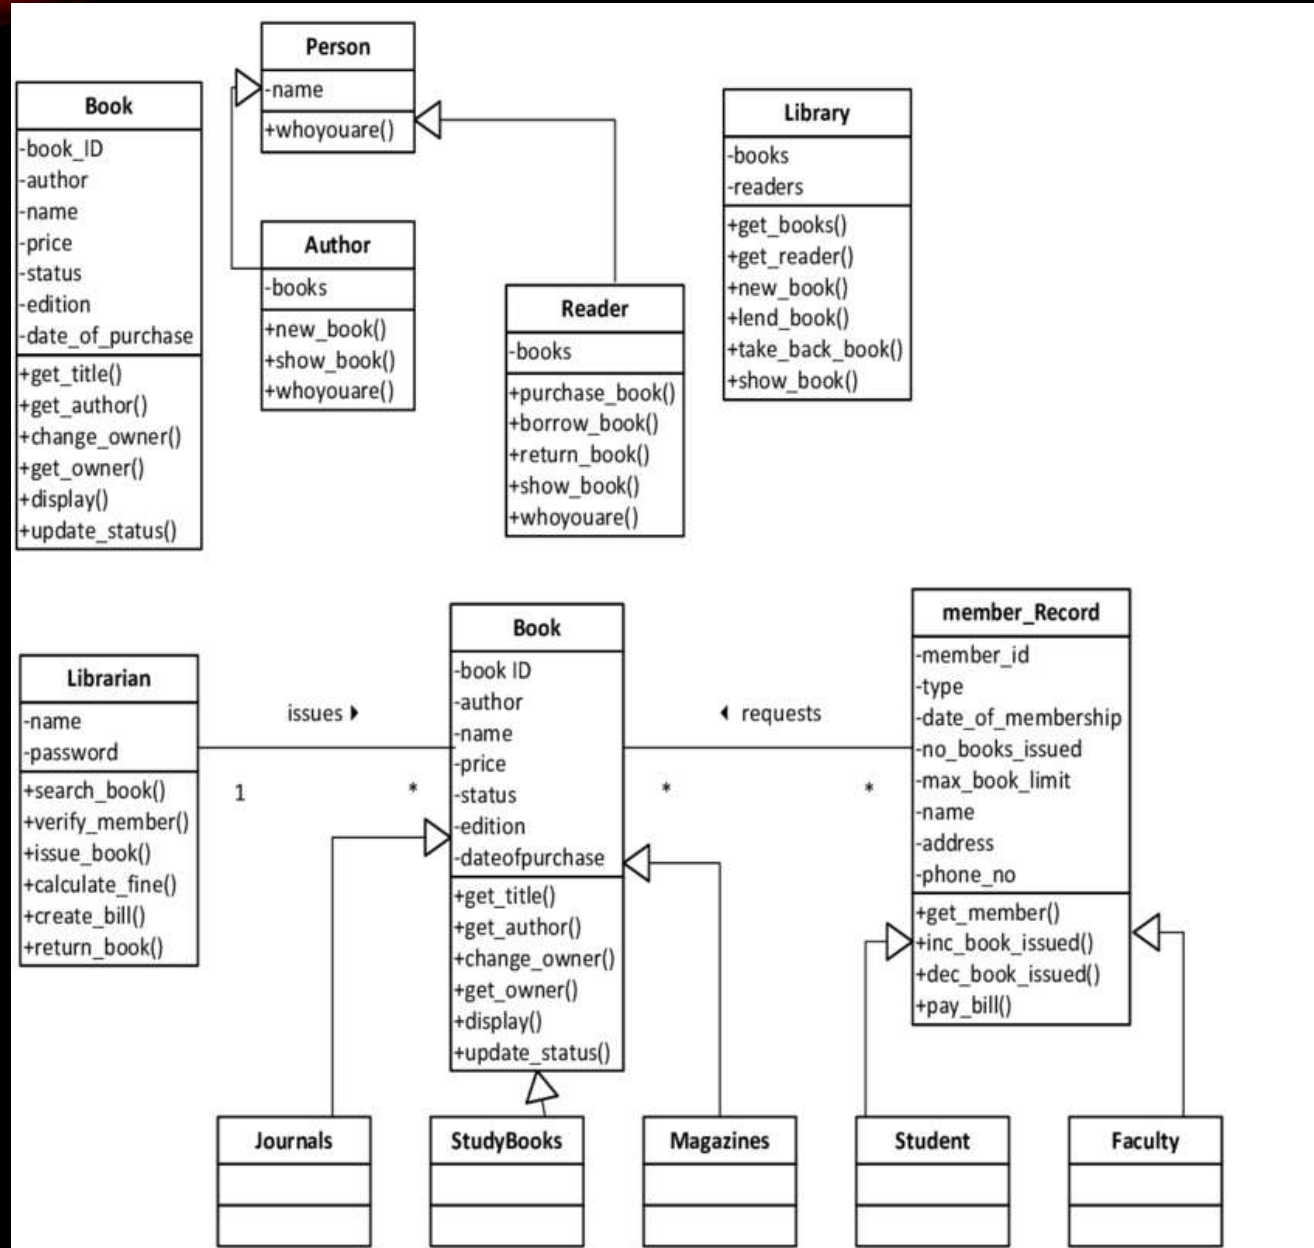

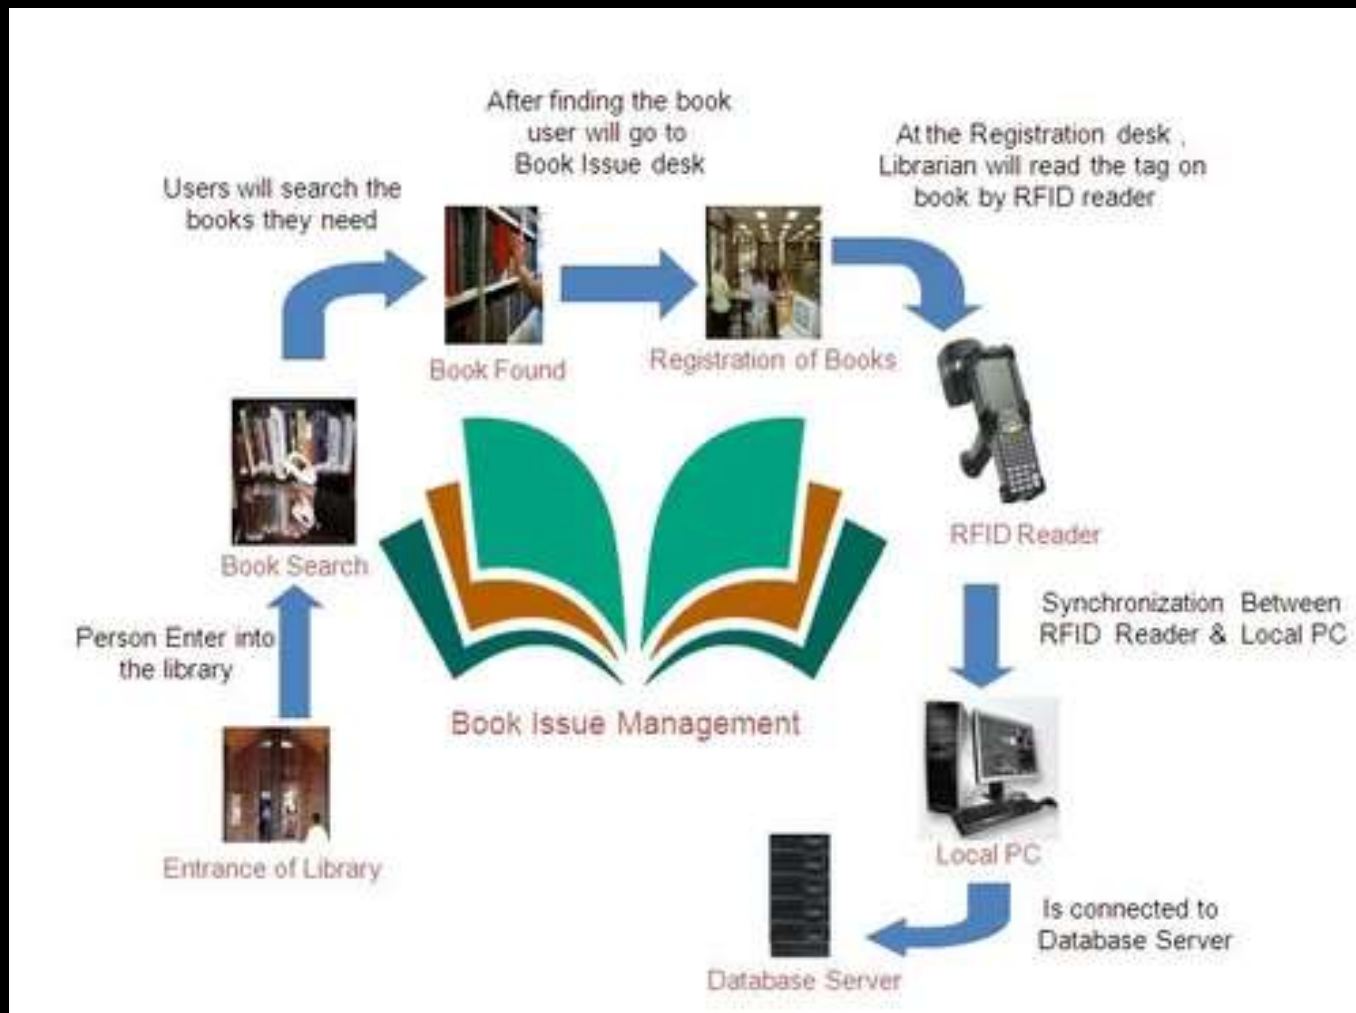

# SENAYAN LIBRARY MANAGEMENT SYSTEM (SLIMS)

- Senayan Library Management System (SLiMS) is open source integrated library management software originally developed in Indonesia with a variety of developers from the different parts of the world including Bangladesh.
- The software was awarded in the category of Open Source by Indonesian ICT Award -2009. Since SLiMS is developed based on Unicode, it completely supports Bangla input, and also it was very good built-in feature of Digital Library and Institutional Repository.
